STORY FOR THE PEOPLE
HARRINGTON'S
FAIRMONT, W. VA.

BITS OF STATE NEWS

A dispatch from Charles Town says: "One of the most beautiful things visible to the eye in the lower Shenandoah valley, and some of the adjoining counties, is the magnificent apple crop which now hangs on the trees, and which will be gathered next week, and probably take more than a month to get in. The crop is said to be the most bountiful ever known, and the quality excellent."

The Wellsburg Herald of Monday said: "Following the frost several nights ago, a great number of people spent yesterday in the woods gathering pawpaws and chestnuts. Every section of the county which contained nuts or pawpaws was invaded by the hunters. It is reported that the pawpaw crop is good this fall, but that the chestnut crop will not be up to the average, and a greater part of the nuts are wormy. An aged local man, who has been gathering chestnuts in this section since the war between the states, said yesterday that chestnuts apparently are becoming more wormy every fall."

The Curbstone story man of the Charleston Mail recently printed the following:

Cussy Baker is 77 years old and his memory extends back three score years and ten.

When advance men for the Robinson show came here a few weeks ago to plaster Charleston and Kanawha county with farding posters to indicate the coming appearance of the big attraction, "Cussy" was as much interested as the younger folks were.

When one of the posters was pasted on a billboard in Virginia street, showing a girl in tights standing on the bareback of a big white horse it attracted his attention and he told those who were standing near that he had seen that same circus just seventy years ago, when he was only seven years old. He said he had forgotten the name of the show, but seeing that poster reminded him it was John Robinson's and that that poster was exactly the same as the one which was displayed back in the 40's. "It's the same woman, and it's the same horse," declared "Cussy," and the first time I saw them was down at Old Sweet Springs. That was in 1846."

Frank Cowen, a resident of South Barboursville, planted a half acre of pop corn last spring and took especial care of it, in the hope that when the snow was blowing he and the children could have merry times about the firsides. When Mr. Cowen went into the field last Saturday to cut the corn he was greatly surprised according to the Huntington Advertiser to discover that rats and field mice had been to it and had devoured the entire crop. The rodents had climbed the stalks and completely destroyed every year, leaving only the fodder standing.

The field presents a strange sight and has been visited by many persons who were interested in the strange phenomenon. As is well known, rats and field mice wait until the corn is cut and put up in shocks before they make their raids, and Mr. Cowen's experience is

said to be the first of the kind ever heard of in this section.

John Hestalla, a foreigner, of Shinnston, failed to "hook" his machine when he drove it over a high embankment at East Shinnston, but when one of the six occupants, all of whom escaped unharmed, went back to look for his hat, he struck a match, set fire to the automobile and burned it up. A quantity of whiskey is said to have been destroyed with the machine. The accident occurred at midnight Saturday.

According to the Grafton Sentinel a party which has been hunting in the wilds on Buffalo Mountain for the past 10 days has returned to that town with a total bag of 64 squirrels, one owl, one hawk and one rattlesnake to its credit. The boys report a fine time during their hunt. Those in the party were D. V. Hickman, Thurman Rogers, Lee Knight, Fred Hickman and I. F. Hickman.

Evening Chat

Haggerty says, bring me the bootleggers, backed by the evidence, and I will prosecute them. This reminded a friend of ours of the story about the woman who opened the back door in response to a knock, and dinner was requested by a tramp. Before she could refuse, the tramp asked if there were any rats about the premises— "Land sakes! yes, lots of them." "Give me a good dinner and I will exterminate every rat on the place," said the tramp.

This sounded good so the lady gave him the best she had and after eating everything in sight the tramp went out and cut a good hickory club, and returning said: "Now, bring on your rats."

Haggerty's attitude toward the bootleggers seems to be about the same as the tramp's. Let the citizens do the work and Haggerty will get the credit.

A brief outline of the work already accomplished is as follows: A players club has been organized and several meetings have been held. A meeting of this branch of the department was held last night. This club as well as all other classes under the supervision of this department are open to the public. Classes in correspondence are being organized throughout the rural districts.

A Children's Literature club has been organized in this city which now has a membership of 25 teachers outside the Normal school. The demand for this feature was unusually strong. The first year Spanish club will meet tonight at 7:30 and the first year French will meet Thursday evening at the same hour. A class in American history has been organized at Farmington and a meeting will be held on Friday evening. A class in education is planned for Monongah and will be organized in the near future.

Saturday morning at ten o'clock the class in Domestic Science which is composed of local people not students of the school will meet and women of the city who are interested in this art may become members of the class on application. Drawing classes will be organized to be under the direction of Miss Laura Briggs. Classes in almost any branch will be organized in the city other cities near by and in the rural districts where a certain number of interested parties can be gotten together.

This department will furnish complete lecture courses of from 3 to 5 numbers upon request and will after the first of the year send out persons to organize play festivals. Advice will be given on school problems, members of the faculty will be sent out upon application to act as judges at various events. His department will send out speakers to address teachers institutes farmers institutes, etc., and in addition will maintain an employment bureau for those desirous of teaching.

As a means of community betterment the Fairmont State Normal school will endeavor this year to lay particular stress on the work of the Normal Extension department which is under the direct supervision of Prof. Walter Barnes and plans are being made to extend the work into Clarksburg, Morgantown and Mannington.

This department of the Normal work was organized in the fall of 1916 and during that term a great deal was accomplished in organization, etc. This year the work will be undertaken on a much larger scale and already classes have been organized in many of the branches to be taught in the extension department. The aim of the extension work is that the school may become of service to teachers in the northern and central part of the State and the president and faculty are working toward making this normal the distinctive school for the training of teachers.

Anybody outside of the school may become members of any of the extension department classes by making application and paying the sum of \$4.50 a semester of four and a half months.

Columbia Orchestrals Records—a Triumph

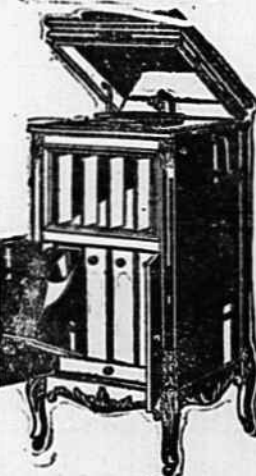

THE orchestra itself seems to burst into sound from Columbia orchestral records.

They carry all the brilliance and spirit of the original rendering—they glow with color, pulse with life. Every one is a triumph—in natural, true and clear reproduction; in tone, timbre, tempo and feeling; in all the qualities that make Columbia orchestral records supreme.

First you will like them for their smart "Newness." Then look more closely—you will appreciate the fineness of their quality.

Swollen Ankles and Feet Are Indications of Kidney Trouble

Swollen ankles and feet are forms of a dropsical condition, due to disordered kidneys. Naturally when the kidneys are diseased the blood is filled with poisonous waste matter, which settles in the feet, ankles and wrists; or under the eyes in bag-like formations.

It is just as necessary to keep the kidneys acting properly as to keep the bowels active, says an eminent physician. When one is sick the first thing to be done is to thoroughly test the kidney secretions.

The very best possible way to take care of yourself is to take a little "Anuric" with the meals. In this way it is readily dissolved with the food, picked up by the blood and finally reaches the kidneys, where it has a tonic effect in rebuilding these organs.

"Anuric" was recently discovered by Dr. Pierce, of Buffalo, N. Y.; it has been thoroughly tested in his laboratory as well as in his Invalids' Hotel. Everyone can quickly associate Dr. Pierce with his great herbal restorative tonic, "Golden Medical Discovery," and his "Favorite Prescription," universally known as an invigorator for womanly ills.

A different person daily offers his or her words of praise of "Anuric." Now Mr. W. R. Bray speaks:

"I am appealing to those who are bothered with backache and a constant tired, worn-out feeling to give 'Anuric' a trial. I suffered from backache, swelling of hands and feet, frequent excretion from the kidneys and many other symptoms. Was unable to work, but after taking just one box of Doctor Pierce's Anuric, according to directions, I am again able and 'O. K.'"

Step into the drug store and get for a 50c package of "Anuric," or send Dr. Pierce 10c for trial package. "Anuric" is 37 times more potent than lithium.

NOTICE! THE UNION DENTISTS

Will in a Few Days Have Their Branch Office In Fairmont, W. Va., Fully Equipped and Ready For Work
